

## Record of Client's Medications' Assistance from MDS

Service Provider Manager or person to whom this responsibility has been delegated:

Enter Visit Times when carer will assist client with medicines held in a Monitored Dosage System (MDS) and fill in Client name box

Care Worker or person assisting the client with their medication:

- Check the label date on the MDS tray to ensure that it is the current tray (check with pharmacy if this date is more 5 weeks before date you are giving the medicines to the patient, or if the patient has been in hospital since this date). Record in table below
  - Administer medicine from the compartment appropriate to the visit time and initial the box
  - If the medicine is not given, please write an administrative code (R, F, O) in the signature box
- R=Refused      F=Family administer      O=Other (record in care plan)
