

# Review of the Carterton Fast Forwards Towards 2010

## Introduction

Carterton published its action plan *Carterton Fast Forward Towards 2010* in 2003 after undertaking a Market Town Healthcheck. Over the last 6 years there has been progress on many of the proposals in the plan, as well as new developments which had not been anticipated. We feel, with many national and local changes taking place, now is a good time to carry out a brief review of the action plan to assess what has been achieved and to identify which projects should be developed and taken forward.

Although it was Carterton Town Council which saw the need for a market Town Healthcheck, it was a wider Town Partnership which undertook the work and started developing the projects, supported by the Project Manager. Although, never adopting a formal constitution, those wider interests continued to be involved, and each year progress has been reported and discussed at the Joint Annual Assembly and information disseminated through local newsletters and magazines.

The main focus of the seminar on April 8<sup>th</sup>, is to look forward, to start to identify potential projects and priorities, taking account of likely constraints and opportunities and with some understanding of what has and has not already been achieved. It is not the intention to produce firm project proposals, but to suggest areas which might merit further work, should they be supported by the wider consultation.

## Review of the CFF Delivery Programme

We have enclosed a copy of the Delivery Plan which was produced in 2003. There followed a 3 year implementation period, where the Project Manager was funded to carry the programme forward. The Town Council has continued to fund her since then and she has continued to work on a range of projects.

A broad appraisal of what has and has not been achieved shows:

### **1. Town Centre**

A clear lack of progress on developing the town centre, though not from a lack of effort from both the town and district councils. Some progress on expanding the local economy and policing.

### **2. Employment opportunities**

A reasonable level of success here.

### **3. Improving social, cultural and recreational facilities**

A high level achievement, mainly due to the major additional project of providing a new Community Centre on the north-east development and two successful heritage projects

### **4. Fostering links with the north-east development and surrounding villages**

Mixed success here. There is still opportunity to do more to help integrate the north-east development with Carterton's established community, and there has been a failure to engage with the surrounding villages

### **5. Enhancing and protecting the environment**

Only limited progress here, although the additional project of the refurbishment of Tower Square has contributed to this objective

### **6. A safe and Accessible Community**

Some small achievements here, but scope to do more

## **The Broader Context**

The Action Plan was not originally produced in isolation, but took account of a range of other relevant local and regional strategies and considerations. It is not the intention here, to revisit all these in depth, but it is important to be aware of some of the current key developments. They include:

### **Carterton Town Council**

Community Strategy

### **West Oxfordshire District Council**

Local Development Framework

### **West Oxfordshire Strategic Partnership**

Sustainable Community Strategy – Shaping Futures

### **Oxfordshire County Council**

Local Transport Plan

### **Oxfordshire Partnership**

Oxfordshire 2030

### **Oxfordshire Economic Partnership**

Economic Strategy 2006-16

### **South East England Development Agency**

Regional Economic Strategy 2006-16

## **Next Steps**

A report from the day's proceedings will be produced, and wider consultation both with the general community and specific groups, such as the Youth Council, will be organised. Once this has taken place a further report with proposals for future projects and actions and some indication about funding opportunities will be published. It will also include suggestions about the form the Partnership might take in the future.

# **Carterton Check – The Delivery Plan and Comments on its implementation at August 2009**

## **The Vision, Strategic Objectives and Aims and Comments after the 3 Year Implementation and 3 further years**

The core of the Action Plan is the Delivery Plan which identifies actions and projects with timescales, costings and priorities which needed to be implemented in order to achieve the overall vision for the community and its surrounding villages. The projects and actions arose from the work of the groups carrying out the healthcheck on transport, the economy, the environment and social & community issues, but have been regrouped under six strategic objectives, discussed and agreed by representatives of all the working groups and the steering group. Each objective has an aim which gives more specific information on what is to be achieved. Revisiting the Action Plan after 6 years we are pleased to see significant progress, but acknowledge there is still much more to do. Projects not specifically identified in the plan, but which have also been undertaken, are shown at the end.

### **Strategic Objectives**

1. Developing the town centre
2. Improving employment opportunities
3. Improving social provision, including cultural and recreational facilities - particularly for young people
4. Fostering links with the NE development and the surrounding villages
5. Enhancing the Environment
6. Making Carterton accessible to all members of the community and surrounding area
