The historic fluvial flood events have been extracted, where possible, from each of the LPA SFRAS. Due to the variety of data sources, lack of specific details in terms of severity and the various types of data used to represent flood events (e.g. sending requests, flood grant claims, etc.), the flood event data has been collated and presented as the total number of repeat flood events occurring at the same settlement location. It does not represent severity of individual flood events on number of properties affected.

Legend:
- Oxfordshire County Administrative Boundary
- LPA Administrative Boundaries
- Historic Flood Map
- Main River

Number of Historic Fluvial Flood Events:
- 10 to 20
- 6 to 10
- 3 to 6
- 2
- 1
